OBJECTIVE

Information Technology undergraduate with a strong interest in software development and a foundation in modern web and mobile application technologies. Familiar with frontend and backend development, RESTful APIs, database systems, and responsive user interfaces. Seeking a Software Engineering Internship to apply technical knowledge, develop practical industry skills, and contribute to real-world software solutions.

KEY COMPETENCIES

- Full-Stack Web & Mobile Application Development
- MERN Stack & Spring Boot Development
- RESTful API Development
- Database Design & Management
- Authentication & Authorization
- Problem Solving & Logical Thinking
- UI/UX Design & Responsive Development
- Debugging & Troubleshooting

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

2024 – Expected 2027

BSc (Hons) in Information Technology

- Currently in 3rd Year — CGPA: 2.6

Bandaranayake College, Gampaha

2022 (2023)

G.C.E. Advanced Level – Commerce Stream

- Successfully completed with 3B's

PROJECTS

EduHub LMS – Learning Management System

2026

Personal Project

Tools: Java 21, Spring Boot, Spring Security, JWT, JPA/Hibernate, MySQL, React, Vite, Tailwind CSS, Axios, Maven, Git, GitHub

GitHub: github.com/DilikaDilmith/LMS-Project-

- Developed a full-stack Learning Management System using Spring Boot, React, and MySQL to manage institutes, courses, assignments, quizzes, attendance, fees, and student progress.
- Implemented role-based access control with five user roles: System Admin, Institute Admin, Lecturer, Student, and Parent.
- Developed secure authentication and authorization using Spring Security, JWT, and BCrypt password hashing.
- Built RESTful APIs using Spring Boot, JPA/Hibernate, Controllers, Services, Repositories, and DTOs.
- Implemented academic features including course management, assignments, quizzes, attendance, fees, notifications, announcements, and student progress.
- Designed a responsive React frontend using Tailwind CSS, React Router, Axios, and React Context API with role-based dashboards.
- Added automated quiz grading, assignment notifications, fee tracking, progress monitoring, and system activity logging.

Task Management System – Full-Stack Web Application

2026

Personal Project

Tools: React.js, Vite, Tailwind CSS, Node.js, Express.js, REST API, MySQL, JWT, bcryptjs, Axios, Git, GitHub

GitHub: github.com/DilikaDilmith/task-management-system

- Developed a full-stack Task Management System using React.js, Node.js, Express.js, and MySQL.
- Implemented secure user authentication using JWT and bcryptjs with protected routes.
- Developed RESTful APIs for creating, viewing, updating, and deleting tasks.
- Built a dashboard to track task status including Pending, In Progress, Completed, and Overdue tasks.
- Added task search, filtering, sorting, and input validation features.
- Designed a responsive mobile-first interface using Tailwind CSS with Dark Mode and a modern glassmorphism design.

FitTrack – Fitness Wellness Tracking Mobile App

2026

Personal Project

Tools: React Native, Expo, React Navigation, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, AsyncStorage, Cloudinary

GitHub: github.com/DilikaDilmith/FitTrack

- Developed a cross-platform fitness and wellness mobile application using React Native, Expo, Node.js, Express.js, and MongoDB.
- Implemented workout management with exercises, custom workout plans, daily schedules, progress tracking, and workout history.
- Added nutrition, calorie, water intake, hydration, and BMI tracking features.
- Built interactive charts to monitor weight, calories, workouts, and water intake.
- Implemented secure authentication using JWT and bcryptjs with protected REST APIs.
- Added offline data storage using AsyncStorage and cloud image uploads using Cloudinary.
- Designed a modern mobile interface with Light/Dark themes, animations, progress indicators, and reusable React Native components.

MatchMate – Campus Lost & Found Platform

2026

Group Project

Tools: React, Node.js, Express.js, MongoDB, Hugging Face CLIP, Sharp, JWT, Recharts

GitHub: github.com/Oshadi15/MatchMate

- Developed a full-stack campus Lost & Found platform using React, Node.js, Express.js, and MongoDB.
- Implemented an AI-based smart matching system using Hugging Face CLIP and image similarity to identify potential lost and found item matches.
- Developed secure user authentication with JWT and bcryptjs, including separate student and admin functionalities.
- Created Lost & Found management, campus assistance, location finder, feedback, and admin dashboard features with interactive analytics.

SKILLS

Programming Languages: JavaScript, TypeScript, Java

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, RESTful APIs, Axios

Databases: MySQL, MongoDB

Frameworks & Libraries: MERN Stack, Spring Security, Spring Data JPA, React Router, React Context API, Expo Router, React Native Reanimated, Lucide Icons, Ionicons, Bcrypt.js, JWT

Tools: Git, GitHub, npm, Maven, Postman

Software Engineering Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, CRUD Operations, API Integration, Software Design Principles

CERTIFICATIONS & LEARNING

- MERN Course – Online
